and found to have died of plague, the plague bacillus showing up plentifully in the smears. This vessel was given a most thorough disinfection, the whole process occupying five days. Article XV and article XVI of Department Circular No. 6 were followed strictly to the letter, with the result that the *Waialeale* is at the present time absolutely clean and free from infection.

Respectfully,

L. E. COFER,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaiian Islands.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Steam chambers installed at the Channel Wharf.

HONOLULU, H. I., October 29, 1901.

SIR : I have the honor to inform you that 2 of the steam chambers lately forwarded here for service at this station have been installed in a most thorough and practical manner by the station force under Superintendent J. D. McVeigh. The only expense attending their installation was that for necessary lumber, extra pipe, bolts, and paint, all of which we bought from the regular station contracts.

It is believed that with the prices charged for labor here, fully \$700 has been saved our allotment by having the chambers installed as just stated. We are now well equipped on the Channel Wharf for outgoing quarantine work, and it will be the policy of this office, unless otherwise ordered, to encourage the performance of this work here should quarantinable disease again appear in Honolulu.

Respectfully,

L. E. COFER,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaiian Islands.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HONDURAS.
